Ref. No. BCCL: PBA/A.G.M/2014/239

Date:- 04.11.2014

To,

The Director (S)

Ministry of Environment & Forest , Govt. of India

Eastern region Officer

A/3, Chandrashekharpur,

Bhubaneshwar - 751023

Subject :- Six monthly Compliance report for the period from 1st 1StApril'14 to 30th Sept'2014 in respect of Cluster VII group of mines.

Dear Sir,

six monthly Compliance Kindly find enclosed herewith report for the period from 1StApril'14 to 30th Sept'2014 in the respect of Cluster VII group of mines.

Hope you will find the same in order.

Chry Dyn Din

Yours faithfully

COMPLIANCE OF EC CONDITIONS of CLUSTER-VII

SI.	A. Specific Conditions by	Compliance
No.	MOEF:	
i.	The maximum production shall not	The approved normative production and peak
	exceed beyond that for which	production for Dhansar UG, Dhansar OC, Kusunda
	environmental clearance has been	OC, Industry UG(closed), Alkusa UG, Ena OC and
	granted.	VOCP under Kusunda Area are 4.157MTPA &
		5.405MTPA respectively. The total production of the
	•	mines under Kusunda Area (part of Cluster VIII Only)
		is 2.03 MT in the year of 2014-15 (april'14 to
		Srpt'14) which is well with in the limit and 1.5 MT in
		'13-'14 (upto Sept.'14) which is well within the limit
		and Simlabahal Colliery, Hurriladih Colliery and
		Burragrarh Colliery are within the limit as given in
		E. Clearance Condition.
ii	The measure identified in the	Master Plan activities are dovetailed with compliance
11	environmental plan for cluster VII	of environmental clearance conditions. The master
	groups of mine and the conditions given	plan deals with fire control and rehabilitation
	in this environmental clearance letter	activities of fire affected areas in the leasehold of
	shall be dovetailed to the	BCCL.
	implementation of the Jharia Action	By implementing the fire control measures air
	Plan.	
	i ian.	pollution and emission of Green House Gases (GHGs)
		from the fire affected areas are being prevented.
		Further rehabilitation of the families from the fire
		endangered area to the safe places is being taken-up
		with the help of State Govt. of Jharkhand.
		The Master plan is being implemented for BCCL as
		per the prioritization of fire and rehabilitation
		activities in approved Master Plan. The brief status of
		Rehabilitation and Fire control measures are as
		enclosed annexure- E
iii	The proponent shall prepare time -	
	series maps of the Jharia Coalfields	
	through NRSA to monitor and prevent	1
	fire problems in the Jharia Coalfields	,
	by Isothermal mapping /imaging and	
	monitoring temperatures of the coal	2012 total the directed extent is decat 2110 initial
	seams (whether they are close to	
	spontaneous ignition temperatures) and	Action is being taken as specified in 20 and as per
	based on which, areas with potential	maria master ran. rurater at reasona 66 , the pater

pollutant	·	
Xiv Specific mitigative measures identified	d Dhanbad Action Plan has been prepared for entire	
for the Jharia Coalfields in th	e BCCL and not cluster wise. It is being implemented	
Environmental Action Plan prepare		
for Dhanbad as a critically pollute		
area and relevant for Cluster VII sha		
	• •	
be implemented.		 -

The locations of monitoring stations in the Jharia Coalfields should be finalized in consultation with the Jharkhand State Pollution Control Board. The Committee stated that smoke/dust emission vary from source to source (fuel wood, coal, flyash from TPPs, silica from natural dust, etc) and a Source Apportionment Study should be got carried out for the entire Jharia Coalfields. Mineralogical composition study should be undertaken on the composition of the suspended particulate matter (PM₁₀ and PM2.5) in Jharia Coalfields and also quantified. These studies would help ascertain source and extent of the air pollution, based on which appropriate mitigative measures could be taken. Xvi

Establishment of ambient environment quality monitoring stations is done. The work of monitoring of ambient environment has already been awarded to Central Institute of Mining & Fuel Research (CIMFR), Dhanbad having CSIR laboratory recognized under the EP Rules and they have started work. Final report yet to be submitted.

Presently ambient air is being monitored through BCCL own Laboratory at HQ level. The result of analysis report is enclosed as Annexure-D.2.

For the source apportionment study the action has been taken to conduct with help of CMPDIL,RI-II.

No groundwater shall be used for the mining activities. Additional water required, if any, shall be met from mine water or by recycling/reuse of the water from the existing activities and from rainwater harvesting measures.

The project authorities shall meet water requirement of nearby village(s) in case the village wells go dry to dewatering of mine No ground water is being utilized for the purpose of industrial use of the water. Mine water has been channelized through pipelines and through delivery in to the old quarry for its is for the community and irrigation purposes. Drinking water is being purchased from the Mineral Area Development Authority (MADA).

Further for the utilization of mine water following actions has been taken by the company

- 1. <u>Installation of Pressure filters</u>: In Kusunda Area, one Pressure Filter, two Slow Sand Filter and one Rapid Gravity Filter Plant are in operation. At East Bassuriya New Colony, proposal for installation of two nos. Pressure Filters of each 15000 GPH capacity is under process.
- Rain water Harvesting: to catch run-off water in colonies Rain water Harvesting is being done. BCCL has constructed rain water harvesting at Koyla nagar Township. In Kusunda Area, proposal for rain water harvesting at two colonies is under process from Civil Department.
- In P.B.Area one integrated filter plant of Capacity of 15000 GPH has been installed and above to function.

Regular monitoring of groundwater level and quality of the study area shall be carried out by establishing a network of existing wells and construction of new peizometers. The monitoring for quantity shall be dome four times a year in premonsoon (May), monsoon (August), postmonsoon (November) and winter (January) seasons and for quality including Arsenic The work of monitoring of ambient environment including ground water monitoring has already been awarded to Central Institute of Mining & Fuel Research (CIMFR), Dhanbad having CSIR laboratory recognized under the EP Rules for Kusunda Area and P.B.Area of Cluster VII.
